

Advancing vibration on foot

343 dm³ climatic chamber, adaptable onto a shaker, with plate accessories to be used as a standard chamber.

Specially manufactured to carry out saturating tests.

Dimensions (mm)	W	D	H

SPECIAL

Technical features

Temperature range

from +150°C to -70°C

Speed variation

9°C/min average within the range

5°C linear from +80°C to -55°C

10°C linear from +80°C to -30°C

Hygrometry

from 10% to 98% humidity within the temperature range from +20°C to +90°C, limited by a dewpoint of 8°C

Ventilation

double flow for a better homogeneity

Homogeneity and Regulation

Temperature homogeneity (carried out with 9 PT100 probes set at 10 cm from the walls)
between $\pm 0,1^{\circ}\text{C}$ and $\pm 1,5^{\circ}\text{C}$

Temperature regulation

below $\pm 0,3^{\circ}\text{C}$ after stabilization

Humidity regulation

from $\pm 0,5\%$ to $\pm 1,5\%$ after stabilization (thanks to the association of the bath regulated at 100th degree Celsius with the capacitive measurement)
